Opis produktu

The Mini Sigma is a durable, corrosion-free polymeric self-cleaning screen filter, with Amiad's unique suction-scanning cleaning technology and is controlled by the new generation, advanced ADI-P controller. Designed to handle low pressures, the Mini Sigma is also modular, offering various installation configurations.

The Mini Sigma is the newest addition to the Sigma family of water filters for protecting irrigation systems. It is a small and lightweight yet durable filter, quick and easy to install, simple to operate, and requires minimal maintenance. The Mini Sigma requires low water and energy consumption with a compact design and small footprint.

→ Technology	Screen
→ Type	Automatic
→ Filtration degree	50-500 micron
→ Flow rate	up to 80 m ³ /h (352 gpm)
